ProFactory Presets

Every voice, instrument, system and room is slightly different, but with a known microphone and mixer, it's still possible to get a head start and speed up your setup using presets.

These EQ presets for the Qu series have been created by professionals to give you the best possible starting point when using Sennheiser microphones on a variety of sources.

File Name	Preset Name	Microphone	Source
LIB000.DAT	e602KICK	e602	Kick Drum
LIB001.DAT	e604SNR	e604	Snare Drum
LIB002.DAT	e604TOM	e604	Toms
LIB003.DAT	e609GTR	e609	Electric Guitar
LIB004.DAT	E614HH	e614	Hi Hats
LIB005.DAT	e835VOX	e835	Vocal
LIB006.DAT	e901KICK	e901	Kick Drum
LIB007.DAT	e902KICK	e902	Kick Drum
LIB008.DAT	e904SNR	e904	Snare Drum
LIB009.DAT	e904TOM	e904	Toms
LIB010.DAT	e906GTR	e906	Electric Guitar
LIB011.DAT	e914ACG	e914	Acoustic Guitar
LIB012.DAT	e914OH	e914	Drum Overhead
LIB013.DAT	e935VOX	e935	Vocal
LIB014.DAT	e945VOX	e945	Vocal
LIB015.DAT	e965VOX	e965	Vocal
LIB016.DAT	MK4ACG	MK4	Acoustic Guitar
LIB017.DAT	MK4GTR	MK4	Electric Guitar

Transferring the presets to the Qu

1. Format a USB drive (an external HDD/SSD or Stick/Key) using the Qu by connecting it to the Qu-Drive port, going to the **Setup** > **Utility** > **Qu-Drive** screen and touching the **Format** button. This will setup the device for use as a Qu-Drive.

Note: If you already use a USB drive as a Qu-Drive for audio/data then you may not need to reformat it, but as these Library files are numbered from '000' be aware you will overwrite any Libraries you've stored on the drive in the past.

2. Remove the USB drive from the Qu and connect it to your computer.

3. Copy all library (*.DAT) files from the **LIBRARY** folder in the ProFactory Mic Preset package you've downloaded to the **[**USB**]\AHQU\LIBRARY** folder on the USB drive (you can choose which presets you transfer to the Qu later).

4. Eject the drive then connect it to the Qu again.

5. Go to the **Setup** > **USB Data** > **Libraries** screen.

6. Copy each Library item you want from the USB drive to the Qu.

   i. Touch a preset on the right from the **USB Libraries** list.

   ii. Touch the ◄ **to Qu** button in the centre.

Note: All presets copied over to the Qu will be included when storing a show.

Recalling a preset

1. Go to the **Processing** screen and select the channel where you want to use the preset.

2. Go to the **PEQ** section for that channel.

3. On a Qu-16, Qu-24, Qu-32 or Qu-Pac, press the **Fn** key (labelled **Library**) to open the PEQ and Channel Library.
   On a Qu-SB, or if using Qu-Pad with any Qu model, touch the **Library** button on the left hand side.

4. On Qu-16, Qu-24, Qu-32 or Qu-Pac, touch the **User** button on the left to show User Libraries.

5. Select the preset you wish to use from the User PEQ Library.

6. Touch the **Recall** button.

If needed, you can now tweak the PEQ and even store your own version of the preset for future use.

Note: Some presets are flat when recalled, though you'll notice frequencies have been adjusted to best suit the microphone and source, meaning you may only need to tweak the PEQ gain controls in the first instance.
