

**QU-16 &  
RUN LI XIN  
LOUNGE**

"THE QU-16 IS EASY TO USE. I CAN CHOOSE TO OPERATE ON THE PHYSICAL SURFACE, OR VIA AN IPAD. IN SUCH A VENUE, THIS IS EXACTLY THE MIXING AND CONTROL EQUIPMENT THAT I AM LOOKING FOR"

OWNER, RUN LI XIN LOUNGE, CHENGDU

## QU-16 & RUN LI XIN LOUNGE

### The Requirement

The brief from the Lounge's owners was to install well known audio and lighting products, with an attractive appearance to match the interior style. They wanted professional sound quality, and most important of all, a system with high efficiency and ease of use.

**ALLEN&HEATH**

## The Solution

Supplied by EZPro's Chengdu branch, the exclusive Lounge has a very advanced sound and lighting system, including EAW speakers and Powersoft amps, centred around a Qu-16 digital mixer.

For easy access for the sound engineers, the Qu-16 is installed in the DJ booth, and remote wireless control of the whole system is available via the Qu iPad app so that the sound engineers can be absent from the room if required.
