

# Custom Control Release Notes

**V1.2.4**

**i** Refer to [www.allen-heath.com](http://www.allen-heath.com) for instructions on how to update the Avantis firmware and important notes about the update.

## V1.2.4 July 2021

Feature Release

### New Features:

- Kiosk version for Android now supports CC-7 and CC-10 touch panels

### Fixes:

- ID328 Under certain circumstances, changing the number of tabs of a tab container could cause Custom Control editor to crash
- ID324 Fader control sensitivity improved

## V1.1.1 August 2020

Maintenance Release

**i** Layouts created in V1.1.0 with AHM Zone post-compressor/post-fader meter types should be re-saved in V1.1.1 with the correct meter tap-off points selected.

### Fixes:

- ID321 Text labels for Meters and Chromatic Meters are not editable in V1.1.0
- ID322 AHM Zone metering not displaying correctly when using Post-Compressor and Post-Fader meter types in V1.1.0

### Known Issues:

- ID313 Dynamic Labels not working with Avantis mixers – will be resolved in future Avantis firmware (V1.10)
- ID317 Setting an invalid send level in Custom Control triggers warning triangle and error log entries on Avantis mixers – will be resolved in future Avantis firmware (V1.10)

## V1.1.0 July 2020

Feature Release

### New Features:

- AHM-64 compatibility
- Avantis compatibility
- Text Colour option added for Button, LED and Source Selector widgets

### Fixes:

- ID286 Gain Reduction meter shows as unavailable on Stereo Group, Stereo Aux and Stereo Matrix
- ID294 Changing colour properties of multiple Chromatic Meters does not work as expected
- ID296 Gain Reduction meter on the right (R) channel of stereo inputs does not update correctly
- ID300 Custom Control app doesn't work with WiFi Mobile Data Assist

**V1.00 June 2019**

This is the first public release of Custom Control.
