

GR3

2 ZONE MIXER

The GR3 is a 2 zone mixer in a 1U chassis.

Dip switches allow for simple setup – no PC needed. GR3 can be remote controlled thru the PL-14 remote controller or any Logic remote.

GR3 offers 2 stereo inputs and 2 mic inputs with analogue EQ on industry standard Phoenix connectors, plus 4 zone outputs.

The 2 stereo zones can be controlled by a separate controller.

Other features include primary and secondary mic modes, EVAC mode for alarm situations, and jukebox mode (setting a priority line input to override background music).

Key Features

- 2 Stereo zones
- Ducker
- Jukebox mode
- Remote control thru PL-14

Benefits

- Emergency mic mode
- EVAC input
- Crossfading
