

CASE STUDY

DLIVE & INDIA TV

“MY TEAM IS VERY IMPRESSED WITH ALLEN & HEATH’S SOUND QUALITY, AND THE FLAGSHIP DLIVE SYSTEM HAS HUGE IO CAPACITY, ENABLING THEM TO MANAGE THE INCREASINGLY WIDE NETWORK OF CHANNELS.”

AJAY SETH

TECHNICAL GENERAL MANAGER

ALLEN & HEATH

**DLIVE &
INDIA TV**

The Requirement

India TV, the country's leading Hindi news channel, underwent an audio refurbishment to create a state-of-the-art broadcast centre, and required a mixing solution to manage audio connectivity.

Part of the Independent News Service Private Ltd., India TV has a reach of over 90 million viewers, and its programmes have won several prestigious awards.

The Solution

India TV was keen to install dLive as a permanent mixer in the studio, selecting the S7000 Surface and DM64 MixRack.

The team find the dLive surface is very user friendly the powerful 96kHz processing core provides “amazing” headroom and extremely low latency, which is an ideal environment for broadcasting. The station also finds the user-defined bus architecture is a big bonus.

S7000 - STUDIO

DM64

- AUDIO CABLE
- FIRE CABLE
- CONTROL CABLE
- DSNAKE CAT5 OR HIGHER
- ETHERNET CAT5 OR HIGHER
- AOIP CAT5e OR HIGHER
- SPEAKER CABLE
