

## The Requirement

An affordable digital mixer to provide guest engineers with all the tools they need and easiness of use in one package.

The mixer must be capable of multitrack recording without expensive external equipment.

## The Solution

Qu is ideal for novice operators and analogue veterans alike, thanks to its colour touchscreen, intuitive user interface and 1 fader / 1 mic input layout. No computer or specialist expertise is required to capture multitrack recordings with the built-in Qu-Drive.
